

To FCC members:I pay for my subscription to XM Satellite Radio. The variety, lack of commercial interruption, and news information that I obtain from this service is far superior to that available elsewhere. Please do not allow the NAB to curtail the rights offered by our first amendment. My commute and my company's morale has been exponentially improved by the quality service offered by satellite radio. Please consider rejecting the NAB's petition 04-160 so that I and the millions of satellite radio subscribers may continue to benefit from the kind of programming that we deserve and have now come to expect.

Gratefully,

Mike Manzo (Business owner, US citizen and satellite radio subscriber)
